ANYTHING ELSE

I love what I get to do for a living, and the places I've been able to do it. I used to enjoy the term "3 or 30 profession" until I realized how close 30 is getting! I think I'll do this a while longer, or at least as long as they'll let me. I enjoy making new friends, the fun of traveling to new places, the joy of company over a well-prepared meal, and the sounds of baseball in the summer. My two kids are no longer kids (27 and 21), and while both currently live in Oregon, we'll see where their futures take us.
